

Baden-Württemberg

Partner Search Mission in the Representation of Baden-Württemberg in Brussels from 8. – 9. November 2007

General Information

Steinbeis-Europa-Zentrum is organizing a partner search mission in the Representation of Baden-Württemberg in Brussels from 8. - 9. November 2007. The meeting will have the following three central topics:

1. Regenerative Energies 2. Life Science 3. Information and Communication technologies.

The aim of the Mission is to increase technological and business co-operations between European research institutions, universities and companies and to prepare common project ideas for FP7.

We are looking for universities or research organisations interested to join / willing to cooperate with research institutes from Baden-Württemberg and could participate in the Partner Search Mission in Brussels.

Research institutes from Baden-Württemberg will therefore bring their project idea and, if possible, a SME who will also take part in the proposal to the Mission. One to one meetings (in English) between the parties from Baden-Württemberg and representatives of research institutes and universities from other European regions will then take place to discuss common project ideas and proposals.

The deadline for participation in the partner search meeting is **Monday 15th October 2007**.

For any questions, please contact the IRC Innovation-Relay Centre in your region or Ms Milena Mikosch, Phone + 49 711 123 4026, Email: mikosch@steinbeis-europa.de.
